PROFILE SUMMARY

In my **eight years of work experience**, I have focused on improving team efficiency and reducing redundant and tedious work. Throughout my career I have had the opportunity to **automate the transfer of thousands of users' data across HRIS and LMS platforms**. I have **developed solutions to reduce the time for administrative tasks to approximately half that of the manual efforts**. I am continuing to improve my skills by learning how to **construct Agentic and RPA workflows using UiPath and Claude**.

SKILLS

Python | UiPath | Rest APIs | Claude | JavaScript | Node.js | React | AWS | MongoDB | PostgreSQL | Snowflake | Agile Methodologies | Agentic Workflows | Git | Github | CI/CD | Object Oriented Programming

WORK EXPERIENCE

Platform Operations Specialist

ACI Learning | Colorado Springs, CO | August 2024 - June 2026

- Designed and developed a library of reusable functions coded in **Python** that were used to **automate administrative tasks in our proprietary content management system**.
- Utilized the library of **Python scripts** to migrate **4000+ users, 1500+ courses and all associated activity data** from all proprietary systems into the main proprietary Learning and Content Management System
- Implemented integrations between **Docebo LMS and external certificate providers** by coding **Python solutions that leveraged those platforms' Rest APIs**.

Training Analyst and Administrator

USIC LLC | Indianapolis, IN | July 2018 - August 2024

- Utilized **JavaScript, HTML and CSS** to develop **over 100 interactive eLearning Courses**.
- Compiled lists of administrative tasks for the Learning & Development team and **automated those tasks using Node.js and Selenium**.
- Migrated user profile data, user completion data and course content from **Paradiso LMS to Docebo LMS** for **approximately 800 courses and over 10,000 users**.

PROJECTS

Sudoku Solver

September 2024

Solves a random Sudoku Puzzle | Web Developer | [Project Link](#)

- Created components for the UI and Sudoku Puzzle board using React.
- Solved the puzzle using a **backtracking algorithm** and animated the results using an **animation state queue**.

CRLT Website

January 2020

Front End Development for Contract CRLT | Front End Developer | [www.crisisresponse.tech](#)

- Discussed **Figma** design documents with the Marketing Director of CRLT.
- Developed razor pages using **C#, JavaScript, HTML and CSS** by referencing the **Figma** documents.

EDUCATION

Bachelor's Degree in Computer Science | Minor in Mathematics | IUPUI - Indianapolis, IN

August 2014 – May 2018
